## Introduction

Truth, Freedom, and Health	4
----------------------------	---

## Part One – Truth

1.1 The Truth about Chlorine Dioxide and Big Pharma & Partners	5
1.2 Disinformation and Suppression against MMS and CDS	6

## Part Two – Freedom

2.1 Make 28% Master Mineral Solution (MMS)	7
2.2 Make 25% Sodium Chlorite Solution (SCS)	8
2.3 Make 4% Hydrochloric Acid Solution (HAS)	9
2.4 Make 50% Citric Acid Solution (CAS)	9
2.5 Make 3,000-ppm Chlorine Dioxide Solution (CDS)	10

## Part Three – Health

3.1 CDS Protocols for Viral Outbreak and Disease	12
3.2 Maintain a Strong Immune System	15

## Appendices

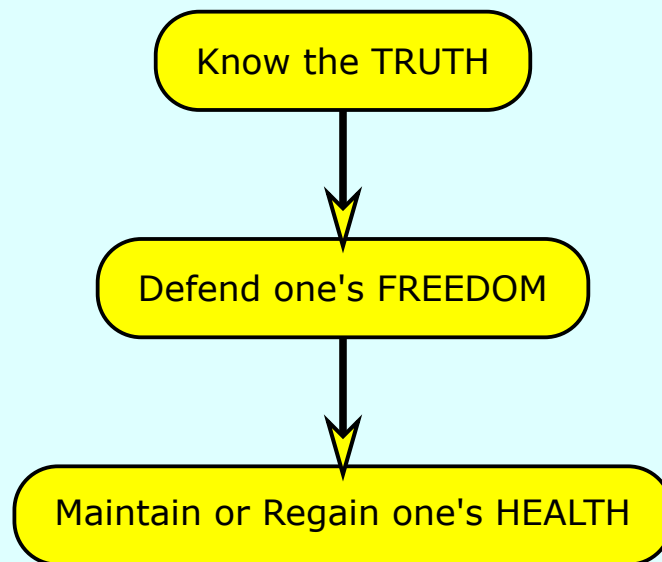

A: Important Facts on MMS	16
B: Toxicity of Chlorine Dioxide	17
C: Clinical Study of Chlorine Dioxide	18
D: Treaties on Chlorine Dioxide	19
E: Donations in US Politics	20
F: Crimes against Humanity: Big Pharma & Partners	21
G: Crimes against Humanity: Chinese Communist Party	23
H: Join the Resistance	24
I: Clinical Trial of CDS	25
J: Bolivia Endorses CDS	26
K: Drugs vs Dilute CDS	27
L: The Game Changer	28
M: Freedom of Speech	29
N: Global Health Revolution	30
O: Quotations on Revolution	31

V: Terms and Abbreviations	41

## Truth, Freedom, and Health

This lifesaving ebook aims to present every citizen in the world the **Truth** about using Chlorine Dioxide – a simple yet amazing substance – for the prevention and treatment of all viral diseases. That is, Chlorine Dioxide can be used to both prevent and treat all the diseases caused by the infection or transmission of a type of microorganism called *virus*.

The right or **Freedom** to use Chlorine Dioxide – for maintaining or regaining the **Health** of oneself – is fundamental to the survival of every citizen in the world. No citizen, therefore, should be denied this fundamental human right by any other citizen – or by any organization or government.

The knowledge of the **Truth** and the defense of the **Freedom** are essential for the **Health** of every citizen in the world:

Worldwide countries should guarantee the freedoms of their citizens by having the following law in their constitutions:

*Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.*

This law is present in the United States Constitution as the *First Amendment*. It guarantees freedoms concerning religion, expression, assembly, and petition:

- It forbids the US federal government from promoting one religion over others and restricting an individual's religious practices.
- It guarantees freedom of expression by prohibiting the US federal government from restricting the press or the rights of individuals to speak freely.
- It guarantees the right of citizens to assemble peaceably and to petition their government.

# The Truth about Chlorine Dioxide and Big Pharma & Partners

## Fact #1

Chlorine Dioxide is a chemical compound with the formula  $\text{ClO}_2$  – 1 Chlorine and 2 Oxygen atoms. It exists as a greenish-yellow gas above  $11^\circ \text{C}$ , as a reddish-brown liquid between  $-59^\circ \text{C}$  and  $11^\circ \text{C}$ , and as bright orange crystals when colder. It does not hydrolyze when it enters water, and it is usually produced as a gas or as an aqueous solution. The British chemist Sir Humphry Davy discovered it in 1814.

## Fact #2

Chlorine Dioxide has been used extensively for bleaching wood pulp (in the paper industry) and for disinfecting water (for human consumption) in Europe and the US. Developments since the 1930s have extended its application into food processing, equipment and premise disinfection, mold eradication, pool treatment, wastewater sanitation, air sterilization and odor control, wound cleansing, dental and oral care, and – a great discovery for mankind – disease prevention and treatment.

## Fact #3

Chlorine Dioxide is the active ingredient in Master Mineral Solution (MMS) and Chlorine Dioxide Solution (CDS) – which have been used for the prevention and treatment of a wide range of diseases, including malaria, arthritis, cancer, autism, diabetes, hepatitis, Alzheimer's, influenza, herpes, MRSA, AIDS, EVD, and COVID. The honorable researcher of MMS is James V. Humble or Hon. Jim Humble. The honorable researcher of CDS is Andreas L. Kalcker or Hon. Andreas Kalcker.

## Fact #4

Chlorine Dioxide is a nontoxic oxidizing biocide: it oxidizes or destroys pathogenic microbes (eg, microscopic bacteria, viruses, fungi, and parasites) – leaving behind no toxic residues. It is highly effective at low concentrations due to its selective oxidizing properties: it affects the organic compounds of the smaller and lower-pH pathogenic microbial cells, not the larger and more-resistant healthy human cells. Moreover, the pathogenic microbes are unable to develop any resistance against it. When used correctly, it poses no toxic or harmful side effects to the human body.

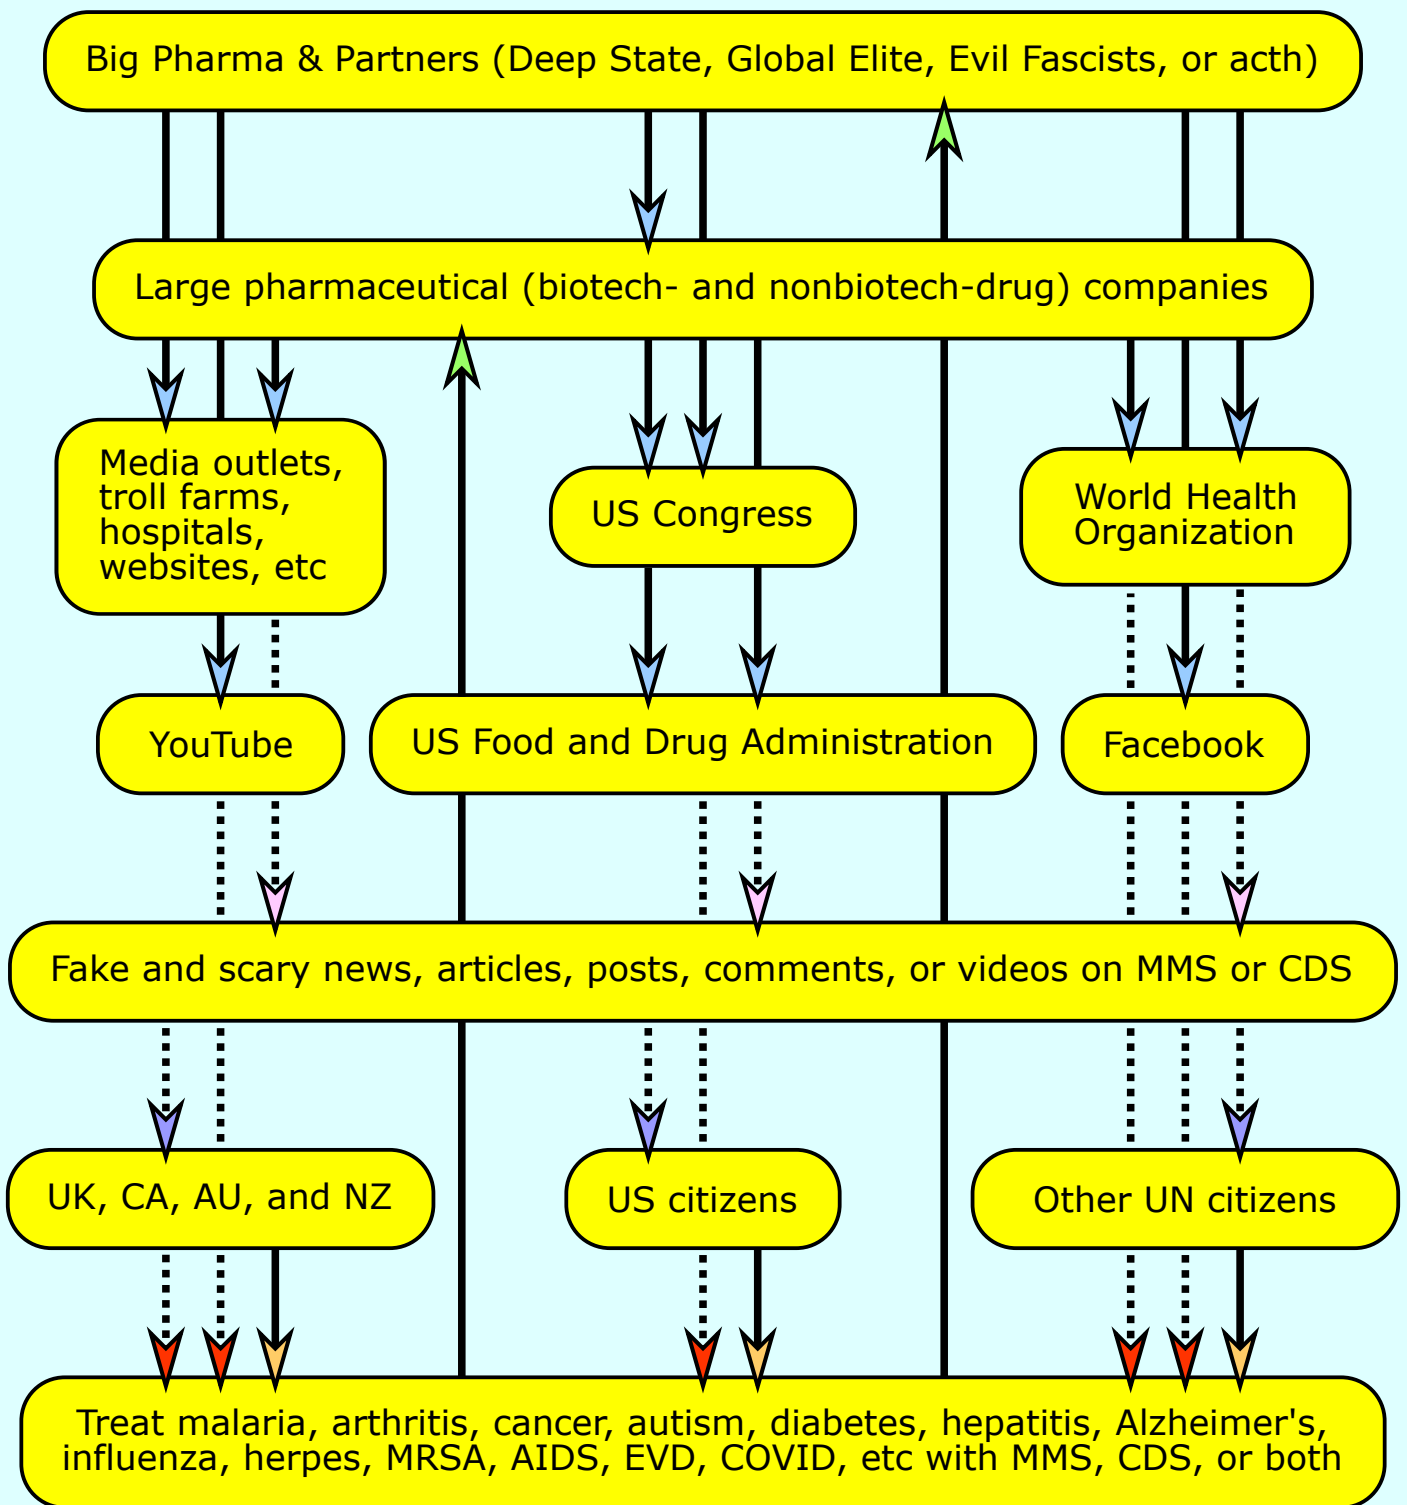

## Fact #5

Chlorine Dioxide helps to get rid of pathogenic microbes, toxins, biofilms (ie, the slimy layers of protected microbes), and heavy metals (eg, lead and mercury). Its widespread use through MMS and CDS – if supported by governments worldwide – will cripple the global pharmaceutical (ie, biotech- and nonbiotech-drug) industry. In order to prevent this from ever happening, Big Pharma and its big partners (ie, Deep State, Global Elite, Evil Fascists, or acth) have been executing disinformation and suppression against MMS, and later against CDS, since 2006 or earlier.

## Fact #6

Chlorine Dioxide is an amazing substance, thanks to its many different uses – from the various bleaching or industrial applications (at high concentrations) to the prevention and treatment of a wide range of diseases (at low concentrations). Unfortunately, the disinformation and suppression – by Big Pharma & Partners – against its use through MMS and CDS have caused many deaths and sufferings around the world, notably during the COVID-19 pandemic. The inhumane and ruthless actions of Big Pharma & Partners are considered crimes against humanity.

# Disinformation and Suppression against MMS and CDS

- control/manipulate (acquire/invest/fund/infiltrate/bribe/threaten/deceive)
- create/invent
- mislead/deceive
- ban/prohibit
- doubt/criticize
- ..... crime against humanity
- cripple/ruin

## MMS (Master Mineral Solution) and CDS (Chlorine Dioxide Solution)

Active ingredient: Chlorine Dioxide (ClO<sub>2</sub>) – used at low concentrations. ClO<sub>2</sub> helps to get rid of pathogens, toxins, biofilms, and heavy metals, which cause a wide range of diseases. When used correctly, it poses no toxic or harmful side effects.

Honorable researcher of MMS: James V. Humble (<https://jimhumble.co>)

Honorable researcher of CDS: Andreas L. Kalcker (<https://andreaskalcker.com>)

**Spread this lifesaving information far and wide! Join the noble fight of the Resistance against Big Pharma & Partners! Save citizens worldwide from the evils and tyrannies of Big Pharma & Partners!**

## Make 28% Master Mineral Solution (MMS)

### Things Needed

1. Sodium Chlorite ( $\text{NaClO}_2$ ) powder or flakes (80% purity, technical grade)
2. Sodium Chlorite solution (any strength above 22.4%, technical grade)
3. distilled (best), reverse osmosis, or purified water (not alkaline or tap water)
4. nonmetallic utensils and containers (eg, spoon, bowl, measuring cup, and bottle)
5. digital kitchen scale with a tare feature; unbleached (best) or white coffee filter

For items 1 and 2, buy either Sodium Chlorite powder or Sodium Chlorite solution from pool supplies stores or chemical suppliers. The powder (or flakes) typically consists of 80% Sodium Chlorite and about 17% Sodium Chloride, 1% Sodium Chlorate, and 2% of other trace compounds. This stabilized mixture, which contains added buffer and only 80% Sodium Chlorite, is safe for handling and storage. It will benefit all citizens if nationwide pharmacies can sell Sodium Chlorite powder (at a government-controlled price) with detailed instructions on how to make 28% MMS.

### How to Make 28% MMS

28% Master Mineral Solution (MMS) is in fact 22.4% Sodium Chlorite Solution (SCS), because only 80% of the dissolved compounds (ie, the Sodium Chlorite powder) in 28% MMS are Sodium Chlorite:  $80\% \times 28\% \text{ MMS} = 22.4\% \text{ SCS}$

#### • Method 1: Using Sodium Chlorite powder

Dissolve 1 part by weight of Sodium Chlorite powder in  $[18 \div 7]$  parts by weight of water.

Example:

Dissolve 140 g of Sodium Chlorite powder in 360 g (ie,  $140 \text{ g} \times [18 \div 7]$ ) of water.

Let the solution stand for 24 hours in a dark place, then optionally filter it with an unbleached coffee filter. Store the MMS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 28% MMS or 22.4% SCS. It can be kept in the refrigerator for extended shelf life.

#### • Method 2: Using Higher-strength Sodium Chlorite Solution (SCS)

Dilute higher-strength SCS (ie, any strength above 22.4%) with this formula:

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute } V \text{ mL} \\ \text{of higher-strength SCS} \end{array} \right] = [( \text{Higher strength} \div \text{Desired strength} ) - 1] \times V \text{ mL}$$

Example:

Higher strength = 28%; Desired strength = 22.4%;  $V \text{ mL} = 400 \text{ mL}$

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute } 400 \text{ mL} \\ \text{of } 28\% \text{ SCS} \end{array} \right] = [(28\% \div 22.4\%) - 1] \times 400 \text{ mL} = 100 \text{ mL}$$

Mix 400 mL of 28% SCS with 100 mL of water to obtain 500 mL of 22.4% SCS. Store the SCS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 22.4% SCS or 28% MMS. It can be kept in the refrigerator for extended shelf life.

## Make 25% Sodium Chlorite Solution (SCS)

### Things Needed

1. Sodium Chlorite ( $\text{NaClO}_2$ ) powder or flakes (80% purity, technical grade)
2. Sodium Chlorite solution (any strength above 25%, technical grade)
3. distilled (best), reverse osmosis, or purified water (not alkaline or tap water)
4. nonmetallic utensils and containers (eg, spoon, bowl, measuring cup, and bottle)
5. digital kitchen scale with a tare feature; unbleached (best) or white coffee filter

For items 1 and 2, buy either Sodium Chlorite powder or Sodium Chlorite solution from pool supplies stores or chemical suppliers. The powder (or flakes) typically consists of 80% Sodium Chlorite and about 17% Sodium Chloride, 1% Sodium Chlorate, and 2% of other trace compounds. This stabilized mixture, which contains added buffer and only 80% Sodium Chlorite, is safe for handling and storage. It will benefit all citizens if nationwide pharmacies can sell Sodium Chlorite powder (at a government-controlled price) with detailed instructions on how to make 25% SCS.

### How to Make 25% SCS

25% Sodium Chlorite Solution (SCS) contains more Sodium Chlorite than 28% Master Mineral Solution (MMS), because 28% MMS is in fact 22.4% SCS. 28% MMS or 22.4% SCS is the original formula developed by Hon. Jim Humble. 25% SCS is the formula preferred by Hon. Andreas Kalcker.

#### • Method 1: Using Sodium Chlorite powder

Dissolve 1 part by weight of Sodium Chlorite powder in 2.2 parts by weight of water.

Example:

Dissolve 150 g of Sodium Chlorite powder in 330 g (ie,  $150 \text{ g} \times 2.2$ ) of water.

Let the solution stand for 24 hours in a dark place, then optionally filter it with an unbleached coffee filter. Store the SCS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 25% SCS. It can be kept in the refrigerator for extended shelf life.

#### • Method 2: Using Higher-strength Sodium Chlorite Solution (SCS)

Dilute higher-strength SCS (ie, any strength above 25%) with this formula:

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute } V \text{ mL} \\ \text{of higher-strength SCS} \end{array} \right] = [( \text{Higher strength} \div \text{Desired strength} ) - 1] \times V \text{ mL}$$

Example:

Higher strength = 30%; Desired strength = 25%;  $V \text{ mL} = 400 \text{ mL}$

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute } 400 \text{ mL} \\ \text{of } 30\% \text{ SCS} \end{array} \right] = [(30\% \div 25\%) - 1] \times 400 \text{ mL} = 80 \text{ mL}$$

Mix 400 mL of 30% SCS with 80 mL of water to obtain 480 mL of 25% SCS. Store the SCS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 25% SCS. It can be kept in the refrigerator for extended shelf life.

## Make 4% Hydrochloric Acid Solution (HAS)

### Things Needed

1. Hydrochloric Acid (HCl) solution (above 4%, no additives, technical or lab grade)
2. distilled (best), reverse osmosis, or purified water (not alkaline or tap water)
3. nonmetallic utensils and containers (eg, spoon, bowl, measuring cup, and bottle)
4. odor-blocking mask and plastic gloves

### How to Make 4% HAS

Dilute higher-strength HAS (ie, any strength above 4%) with this formula:

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute } V \text{ mL} \\ \text{of higher-strength HAS} \end{array} \right] = [(\text{Higher strength} \div \text{Desired strength}) - 1] \times V \text{ mL}$$

Example:

Higher strength = 20%; Desired strength = 4%; V mL = 100 mL

$$\left[ \begin{array}{l} \text{The amount of water} \\ \text{required to dilute 100 mL} \\ \text{of 20\% HAS} \end{array} \right] = [(20\% \div 4\%) - 1] \times 100 \text{ mL} = 400 \text{ mL}$$

Mix 100 mL of 20% HAS with 400 mL of water to obtain 500 mL of 4% HAS. Store the HAS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 4% HAS.

## Make 50% Citric Acid Solution (CAS)

### Things Needed

1. Citric Acid ( $C_6H_8O_7$ ) powder or crystals (99% purity, food or lab grade)
2. distilled (best), reverse osmosis, or purified water (not alkaline or tap water)
3. nonmetallic utensils and containers (eg, spoon, bowl, measuring cup, and bottle)
4. digital kitchen scale with a tare feature

### How to Make 50% CAS

Dissolve 1 part by weight of Citric Acid powder in 1 part by weight of water.

Example:

Dissolve 300 g of Citric Acid powder in 300 g (ie, 300 g x 1) of water. The solution will temporarily turn cold. Store the CAS in a bottle (made of tinted glass, HDPE, or PP), away from heat and direct sunlight. Label the bottle as 50% CAS.

## 4% HAS vs 50% CAS for Activating 28% MMS and 25% SCS

Buy either higher-strength HAS or Citric Acid powder (or buy both) from hardware stores, grocery stores, or chemical suppliers. Either the 4% HAS or the 50% CAS can be used to activate the 28% MMS and the 25% SCS. The 4% HAS is preferred by some people due to better taste or better tolerance of the stomach, especially when the ingestion of activated MMS or SCS is required. However, some other people prefer the 50% CAS, especially when the aforementioned ingestion is not required. Citric Acid powder is also sometimes more readily available and easier to transport.

# Make 3,000-ppm Chlorine Dioxide Solution (CDS)

Method A: Double Infusion at Room Temperature (21–25° C)  
Using Sodium Chlorite Solution (SCS) and Hydrochloric Acid Solution (HAS)

**1**

Airtight lid

Glass/HDPE/PP container

Shot glass

250 mL of distilled or purified water

5 mL of 25% SCS and 5 mL of 4% HAS

**2**

Leave the container for 12 hours in a dark place, followed by 2 hours in the refrigerator.

Reaction solution

**3**

Replace the reaction solution with 5 mL of 25% SCS and 5 mL of 4% HAS.

Leave the container for 12 hours in a dark place, followed by 2 hours in the refrigerator.

**4**

The color of the reaction solution is the same as the color of the CDS.

3,000-ppm CDS

Store the CDS in a bottle. Label the bottle and keep it in the refrigerator.

Method B: Single Infusion at Room Temperature (21–25° C)  
Using Sodium Chlorite Solution (SCS) and Citric Acid Solution (CAS)

**1**

Airtight lid

Glass/HDPE/PP container

Shot glass

250 mL of distilled or purified water

10 mL of 25% SCS and 10 mL of 50% CAS

**2**

Leave the container for 12 hours in a dark place, followed by 2 hours in the refrigerator.

The color of the reaction solution is the same as the color of the CDS.

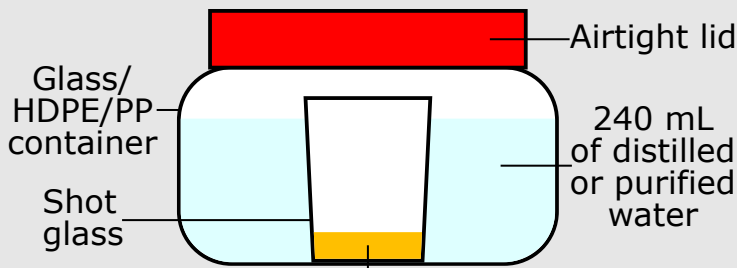

3,000-ppm CDS

Store the CDS in a bottle. Label the bottle and keep it in the refrigerator.

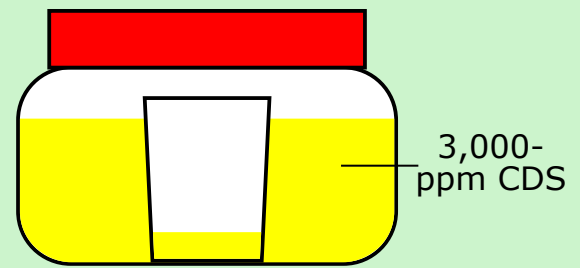

Method C: Single Infusion at Refrigerator Temperature (3–7° C)  
Using Master Mineral Solution (MMS) and HAS or CAS

Leave the container for 36–60 hours in the refrigerator.

The color of the reaction solution is the same as the color of the CDS.

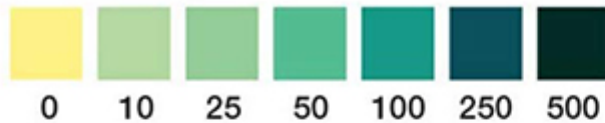

1 12 mL of 28% MMS and  
12 mL of 4% HAS or 50% CAS

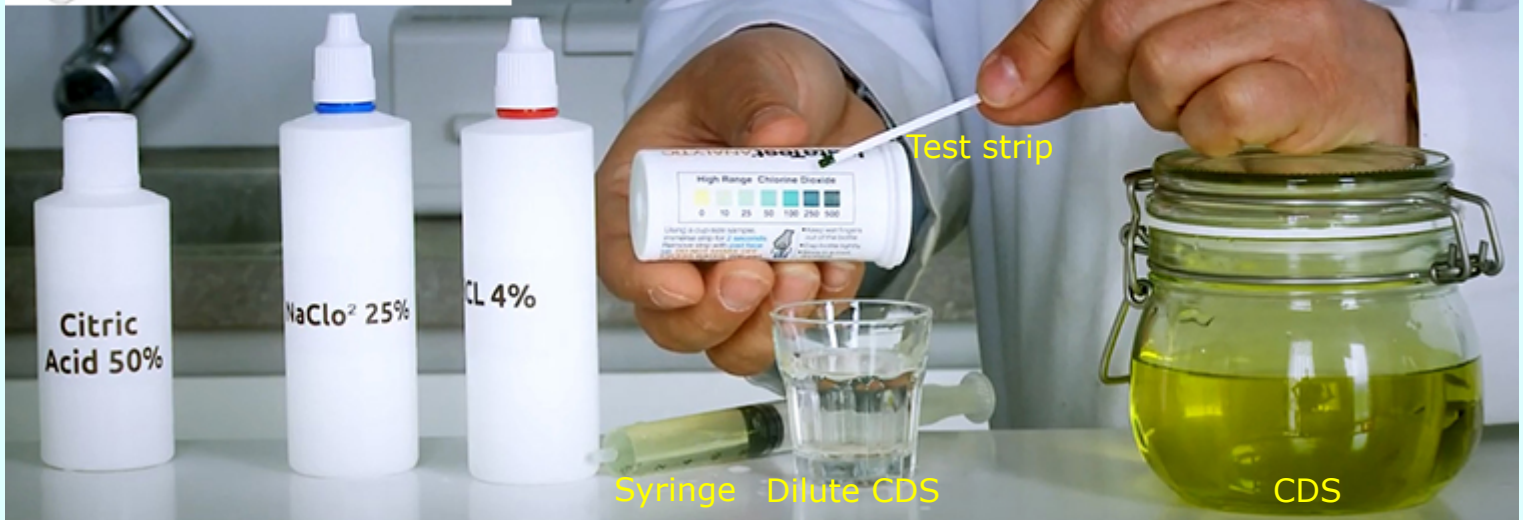

2 Store the CDS in a bottle.  
Label the bottle and  
keep it in the refrigerator.

Use container and bottle made of glass (best), HDPE, or PP. Avoid inhaling any escaped Chlorine Dioxide gas during the process. Accidental inhalation in small amount is harmless. For methods A and B, if the room temperature is below 21° C, leave the container for up to 24 hours in a dark place, followed by 2 hours in the refrigerator.

Test the Concentration of 3,000-ppm CDS

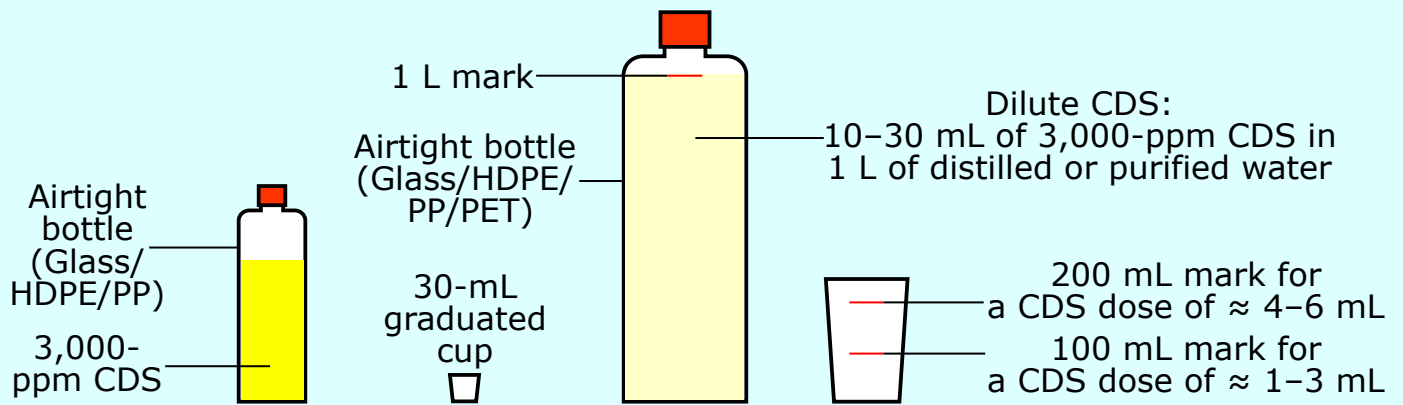

LaMotte Insta-Test  
Chlorine Dioxide  
Test Strip, Code 3002,  
0–500-ppm Range

**Method A:** Add 1 mL of the CDS to 59 mL of water. Dip the test strip in the Dilute CDS for 2 seconds, then remove it with its pad facing up. Do not shake off any excess liquid. Wait for 10 seconds, then compare the pad's color against the color chart. If the CDS's concentration is 3,000 ppm, the pad's color will match the chart's 50-ppm color. If the CDS's concentration is slightly higher than 3,000 ppm, the pad's color will be in between the chart's 50-ppm and 100-ppm colors, nearer to the former.

**Method B:** Add 10 mL of the CDS to 90 mL of water. Follow the dipping and comparing steps in Method A. If the CDS's concentration is 3,000 ppm or slightly higher, the pad's color will be in between the chart's 250-ppm and 500-ppm colors, nearer to the former.

## CDS Protocols for Viral Outbreak and Disease

### Protocol C (Common) – Preventing Infection and Treating Chronic Disease

Add 10 mL of 3,000-ppm CDS to 1 L of water in a bottle – to make Dilute CDS ( $\approx$  30 ppm). Drink 100 mL (ie,  $\approx$  one-tenth) of the Dilute CDS every hour, 10 times a day. This is equivalent to taking a CDS dose of  $\approx$  1 mL every hour – for people of 60 kg and above. If one has been in close contact with an infected person, take a higher dose of 1.5 mL. Add 15 mL of CDS to 1 L of water in a bottle ( $\approx$  45 ppm) to obtain an hourly dose of  $\approx$  1.5 mL. The health care personnel who take care of infected patients may require a much higher dose of 2–3 mL, especially if they are at an altitude of 2,600 m and higher.

For body weight of under 60 kg, use **2** or **3** mL of CDS for each 12 kg. Dilute the CDS with **100** or **66.6** times of water, respectively. For example, a 24-kg child requires 4 mL (ie,  $[24 \div 12] \times 2$  mL) of CDS. Add 4 mL of CDS to 400 mL (ie,  $4 \text{ mL} \times 100$ ) of water in a bottle ( $\approx$  30 ppm). Drink 40 mL (ie,  $\approx$  one-tenth) of the Dilute CDS every hour, 10 times a day. If the child has been in close contact with an infected person, take a higher dose. Add 6 mL (ie,  $[24 \div 12] \times 3$  mL) of CDS to 400 mL (ie,  $6 \text{ mL} \times 66.6$ ) of water in a bottle ( $\approx$  45 ppm) to obtain a higher hourly dose.

There was a clinical trial in South America that used Dilute CDS to treat COVID-19 – all the mildly-to-critically ill patients recovered. The usual oral dosage prescribed in the trial was  $\approx$  1.67 mL of 3,000-ppm CDS an hour, 10 times a day.

In the case of treating chronic illnesses or diseases, increase the hourly dose slowly. Depending on how one feels, build up the dose slowly to 3 mL (for people of 60 kg and above). Add up to a maximum of 30 mL of CDS to 1 L of water. If a higher dose (ie, 4–6 mL of CDS) is necessary, prepare enough of the Dilute CDS for more intake (ie, 200 mL of Dilute CDS) each hour.

Do not take more than 5 mL an hour for each 100 kg of body weight (or more than 60 mL a day). For example, if one weighs 60 kg, do not take more than 3 mL (ie,  $[60 \div 100] \times 5$  mL) an hour. A 24-kg child should not take more than 1.2 mL (ie,  $[24 \div 100] \times 5$  mL) an hour. If there is a mild throat irritation after taking the dose (which is brief and harmless), optionally dilute the daily dose with more water. In case of nausea or discomfort, reduce the dose by 50% until the reaction goes away.

Follow the Three Golden Rules of MMS:

1. Feeling better?  
Do not change anything. Continue with what you are doing.
2. Feeling worse?  
Reduce the dose by 50% until the reaction goes away, then build back up slowly.
3. Not feeling better or not feeling worse?  
If there are no signs of improvement after 5–6 days, increase the dose or switch to another protocol.

Antioxidants – especially Vitamin C or Ascorbic Acid – can easily neutralize Chlorine Dioxide. Throughout the treatment period, avoid antioxidant supplements and high-antioxidant foods and drinks (eg, orange or citrus fruits, mango, pineapple, kiwifruit, berries, chocolate, tea, milk, coffee, alcohol, and fruit juices). If one needs to take meal or medicine, observe an interval of 1 hour. This protocol can be administered for the treatment of most chronic illnesses or diseases. It is also suitable for the regular detoxification or cleansing of the body. The treatment can be for as long as it is necessary until one feels fully recovered.

### **Protocol F (Frequent) – Treating Mild-to-Severe Infection or Symptoms**

Add 10 mL of 3,000-ppm CDS to 500 mL of water in a bottle – to make Dilute CDS ( $\approx 60$  ppm). Drink 63 mL (ie,  $\approx$  one-eighth) of the Dilute CDS every 15 minutes, 8 times a session (of 1 $\frac{3}{4}$  hours) – for people of 60 kg and above with mild symptoms. Use 15 mL of CDS if one has *fmss* (ie, a fever or moderate-to-severe symptoms). Use 20 mL of CDS if one has *fmss*, and has  $\leq 92\%$  oxygen saturation or is at an altitude of 2,600–3,600 m. Use 30 mL of CDS if one has *fmss*, and has  $\leq 85\%$  oxygen saturation or is at an altitude  $> 3,600$  m. When using 15, 20, or 30 mL of CDS, dilute the CDS with 500, 750, or 1,000 mL of water, respectively.

For body weight of under 60 kg, use 2, 3, 4, or 6 mL of CDS for each 12 kg. Dilute the CDS with 50, 33.3, 37.5, or 33.3 times of water, respectively. For example, a 24-kg child who has *fmss* requires 6 mL (ie,  $[24 \div 12] \times 3$  mL) of CDS. Add 6 mL of CDS to 200 mL (ie, 6 mL  $\times$  33.3) of water in a bottle ( $\approx 88$  ppm). Drink 25 mL (ie,  $\approx$  one-eighth) of the Dilute CDS every 15 minutes, 8 times a session. Use 4 mL of CDS if the child has *fmss*, and has  $\leq 92\%$  oxygen saturation or is at an altitude of 2,600–3,600 m. Use 6 mL of CDS if the child has *fmss*, and has  $\leq 85\%$  oxygen saturation or is at an altitude  $> 3,600$  m. Administer this protocol once/twice a day:

Once Administer it in the morning, followed by Protocol C after a 2–3-hour break a day: (for mild-to-severe symptoms: runny nose, sore throat, chills, body aches, fatigue, dry cough, fever, shortness of breath, vomiting, dizziness, etc).

Twice Administer it in the morning and afternoon, with a 2–3-hour break in a day: between sessions (for severe symptoms: fever, shortness of breath, etc).

Do not take meal or medicine from one hour before to one hour after the session. Follow the dietary restrictions of Protocol C and the Three Golden Rules of MMS.

### **Protocol Y (Yellow Infusion) – Treating Critical Infection or Symptoms**

Add 5–50 mL of 3,000-ppm CDI (Chlorine Dioxide Infusion: CDS made with 0.9% saline) to 500 mL of 0.9% saline in an infusion bag – to make saline Dilute CDS. Use a digital pH meter to ensure that the pH of the saline Dilute CDS is 7.4–7.8 to avoid phlebitis. Buffer its acidity with Sodium Bicarbonate if necessary. Use it for intravenous (IV) infusion. The typical schedule is 3–4 consecutive days of infusion.

Example for a 60-kg patient who is not on a ventilator (at an altitude  $< 2,600$  m): Using 5 mL of CDI: 505 mL of  $\approx 30$ -ppm saline Dilute CDS, 3–4 hours of infusion – followed by Protocol C after a 2–3-hour break.

Example for a 60-kg patient who is on a ventilator (at an altitude  $< 2,600$  m): Using 10 mL of CDI: 510 mL of  $\approx 60$ -ppm saline Dilute CDS, 7–8 hours of infusion.

Cover the infusion bag with a dark covering (eg, a black plastic bag) to protect the saline Dilute CDS from ultraviolet (UV) light. If the patient has  $\leq 85\%$  oxygen saturation and is at an altitude of 2,600–3,600 m, use 20 mL of CDI. If the oxygen saturation is  $\leq 75\%$  and the altitude is  $> 3,600$  m, use 30 mL of CDI. In the case of near-death patients at home and of patients with morbid obesity, use 50 mL of CDI. The drip rate should be slow at 15 drops (or less) a minute to avoid phlebitis.

This protocol must be administered under the supervision of a physician or a health care professional. Follow the dietary restrictions of Protocol C. For more details on this protocol, consult the physicians at COMUSAV (World Health and Life Coalition), who have already treated over 100,000 COVID-19 patients successfully with Dilute CDS. Watch video 41 (Scientific Efficiency of ClO<sub>2</sub>) in Appendix Q.

### **Protocol E (Enema) – Treating Severe-to-Critical Infection or Symptoms**

Add 10 mL of 3,000-ppm CDI (Chlorine Dioxide Infusion: CDS made with 0.9% saline) to 500 mL of 0.9% saline in an infusion bag – to make saline Dilute CDS ( $\approx$  60 ppm) for patients of 60 kg and above. Connect a nasogastric tube to the infusion bag. Lay the patient in a position to receive the enema (ie, the saline Dilute CDS). Gently insert the nasogastric tube into the rectum as deeply as possible until the beginning of the descending colon. Slowly squeeze the infusion bag until it is empty, then remove the nasogastric tube.

This is not an evacuation enema but a retention one. The retention of the saline Dilute CDS inside the descending colon facilitates the absorption of Chlorine Dioxide into the bloodstream. The recommended retention time is between 3 and 5 minutes. Depending on the severity of the symptoms and the altitude, 20 or 30 mL of CDI can be used with 750 or 1,000 mL of 0.9% saline, respectively.

This protocol must be administered under the supervision of a physician or a health care professional. Follow the dietary restrictions of Protocol C. For more details on this protocol, consult the physicians at COMUSAV (World Health and Life Coalition).

### **Protocol D (Dermatological) – Disinfecting the Skin and Objects**

Add 30 mL of 3,000-ppm CDS to 60 mL of water in a spray bottle – to make Dilute CDS ( $\approx$  1,000 ppm). Spray the Dilute CDS at the desired area on the body (eg, face, neck, and hands) or on objects.

### **Protocol N (Nasal) – Disinfecting the Nose and Mouth**

Add 5 mL of 3,000-ppm CDS to 100 mL of water in a nasal-wash bottle – to make Dilute CDS ( $\approx$  143 ppm). Wash the nasal cavities and gargle with the Dilute CDS. This decreases the viral load in the nose and mouth. This protocol is recommended for the health care personnel who work in the Intensive Care Unit (ICU).

### **Protocol O (Ophthalmological) – Disinfecting the Eyes**

Add 2–3 mL of 3,000-ppm CDS to 150 mL of water (or 0.9% saline) in an ophthalmological dropper bottle (made of HDPE, PE, or PP) – to make Dilute CDS ( $\approx$  40–60 ppm). Put a few drops of the Dilute CDS in each eye.

### **Protocol H (Hospital/House) – Preventing Transmission**

Put 10 mL of 3,000-ppm CDS in a glass. Place the glass on a table inside a room. The evaporated Chlorine Dioxide gas disinfects the environment, preventing the transmission between patients and health care personnel. When the 10 mL of CDS (for a 10-m<sup>2</sup> area) in the glass becomes colorless, replace it with the same amount.

### **Protocols for Other Purposes**

There are other protocols that use 3,000-ppm CDS – and the activated drops of 28% MMS and 25% SCS – for the health care of not only humans but also animals. The informative books and official websites of the honorable researchers Hon. Jim Humble and Hon. Andreas Kalcker are highly recommended.

## Maintain a Strong Immune System

A weak immune system is unable to fend off pathogenic microbes, toxins, or heavy metals. The actions below are recommended to maintain a strong immune system.

**1.** Maintain good nutrition by having an adequate daily intake of essential nutrients: carbohydrate, protein, fat, vitamins, minerals, phytochemicals, fiber, and water.

Determine one's ideal body weight that corresponds with a Body Mass Index (BMI) of 20–23 kg/m<sup>2</sup> for both men and women, aged 18 and above. Next, determine the Daily Caloric Intake (DCI) required for maintaining the ideal body weight.

1 g of carbohydrate or protein provides 4 calories; 1 g of fat provides 9 calories. Obtain 70–80% of DCI from carbohydrate, 10–15% of DCI from protein, and 10–15% of DCI from fat. Limit or avoid trans fats, saturated fats, and cholesterol. Maximize the intake of essential fatty acids Omega-6 Linoleic Acid (LA) and Omega-3 Alpha-Linolenic Acid (ALA) in the ratio of 2–4 (LA) to 1 (ALA), respectively.

Consume unprocessed or minimally processed foods and drinks (preferably organic) whenever possible. They contain more nutrients (which are naturally occurring) than refined or heavily processed foods and drinks (which typically contain added salt, sweeteners, flavorings, colorings, preservatives, or other food additives that are potentially harmful). Limit or avoid Genetically Modified Organism (GMO) food products. Chew food thoroughly until it turns into a liquid mush to aid digestion.

Consume fermented foods (preferably homemade) that contain good bacteria. The bacteria, like the good ones in the gut, aid digestion and produce certain vitamins, including Vitamin B12. Well-planned diets, including vegetarian and vegan diets that incorporate a variety of fruits and vegetables, have no need of dietary supplements.

Limit caffeinated drinks (eg, coffee and tea). Do not drink alcohol or smoke tobacco. Drink half the body weight in fluid ounces of water a day. For example, if one weighs 134 lb, drink 67 fl oz (ie,  $134 \div 2$  fl oz) of water a day. Regular table salt has about 40% Sodium. Add  $\frac{1}{8}$ – $\frac{1}{4}$  level tsp of unrefined salt (ie, the trace mineral-rich sea salt that has only 32–36% Sodium and no food additives) to each 1 L of drinking water.

Do not consume more than 2,100 mg of Sodium a day for each 100 kg of ideal body weight. For example, if one weighs 60 kg, do not consume more than 1,260 mg (ie,  $[60 \div 100] \times 2,100$  mg) of Sodium a day. Ensure that the daily Potassium intake is 2–4 times that of Sodium. Limit the daily Calcium intake to 1 g for each 100 kg of ideal body weight. The daily Magnesium intake should be  $\frac{1}{2}$ –1 times that of Calcium.

**2.** Do aerobic exercise for 30–60 minutes, 1–2 times a week. Add some stretching and strength-training (or weight-bearing) exercises. Follow the Three S's of Fitness (ie, the three basic principles of overall fitness): Stamina, Strength, and Suppleness.

**3.** Rest sufficiently every night with 7–9 hours of sound sleep. Eat a light dinner and let the stomach be empty before going to bed by 11 o'clock at the latest.

**4.** Synthesize natural Vitamin D by exposing the skin as much as possible to high-intensity (90%) sunlight for 10–20 minutes, or to moderate-intensity (60%) sunlight for 30–40 minutes, 1–2 times a week. Do not use sunscreen. Depending on the occurrence of sunburn, reduce or increase the duration of the exposure.

**5.** Reduce stress and anxiety with hobbies (eg, watching shows, playing games, and reading books), exercises (eg, dancing, kickboxing, and tai chi), social interaction (eg, text messaging and physical chat), meditation (eg, positive-thinking, gratitude, and breathing meditation), religious study (eg, the study of the sacred texts, beliefs, and practices of one's religion), or other enjoyable stress-relieving activities.

## Important Facts on MMS

Hon. Jim Humble provides the information below on his official website.

- Chlorine Dioxide has been used to purify water for more than 70 years.
- Chlorine Dioxide (which is MMS) has been taken as a health drink for more than 85 years by hundreds of thousands of people in the US.
- Chlorine Dioxide is used in more than 1,000 public water works to kill the diseases of mankind. Why would anyone refuse to believe that it cannot be used to kill the diseases [and the disease-causing pathogens] in the water [and cells] of the human body?
- Sodium Chlorite, from which Chlorine Dioxide is derived, has been sold by more than a dozen companies to improve health for decades.
- In 1996, I discovered that Sodium Chlorite (MMS) eradicates malaria in as little as four hours. Since that time, many thousands have already recovered to prove it, but the mainstream media has prevented it from becoming known.
- Since my discovery, various other diseases of hundreds of thousands have been overcome in more than 150 countries (that we know of) of the world by using Chlorine Dioxide (this is MMS, which is made from Sodium Chlorite).
- In 2012, the Red Cross did a test in Uganda using activated Sodium Chlorite (MMS), where 154 malaria victims were cured out of 154 cases. That is 100%.
- Although there are more than 100,000 patents concerning the industrial use of Chlorine Dioxide starting in the 1930s, there are also many patents concerning the curing of incurable diseases. These patents started in the early 1980s and they are on record in the patent office so that you can have a copy for free. That is proof.
- The FDA, EPA, and other government agencies have written many articles praising the use of Chlorine Dioxide on food and other uses (showing that it is not poisonous). Unfortunately, some of this information is disappearing from the internet.
- Fake news has been active in denying that Chlorine Dioxide (as MMS) helps fight disease and has confused it with common household bleach. They deny the truth by telling lies. Common household bleach (NaOCl) [ie, Sodium Hypochlorite] destroys pathogens through chlorination. Chlorine Dioxide (ClO<sub>2</sub>) kills pathogens through the process of oxidation. There is a big difference.
- Chlorine Dioxide (MMS) brings longevity. Since Chlorine Dioxide kills most diseases, it kills diseases that kill older people. This means there is a good chance that 10 to 20 years of extended life (and better quality of life) can be given to those taking MMS.
- The FDA and other government agencies have written articles branding Chlorine Dioxide as extremely poisonous. However, they have praised its use on food.
- Pharmaceutical drugs almost exclusively treat symptoms of diseases and not the cause of the diseases. This is a way of keeping people sick and dependent on drugs.
- MMS kills viruses as well as pathogens of other diseases. The medical profession has nothing that affects [ie, directly and effectively destroys] viruses, and thus all they can do if you have a viral disease is make you as comfortable as possible and give antibacterial [or antiviral] drugs that may or may not help.

## Toxicity of Chlorine Dioxide

Hon. Andreas Kalcker provides the information below on his official website.

The toxicity of a substance is defined by its amount that makes it toxic, the place where it affects, its concentration, and the duration of the exposure to it.

We can read articles online, especially the disinformation articles created by the detractors of Chlorine Dioxide treatments [ie, Big Pharma & Partners], stating that Chlorine Dioxide is a toxic gas and a very strong oxidant used for the bleaching of raw textiles and wood pulp. There is certainly generic documentation that indicates this. However, when we look at it in detail, we can see that the amount used is not even close to those described in my book [ie, the book *Forbidden Health: Incurable Was Yesterday*]. The aqueous solution of Chlorine Dioxide used for the bleaching of raw textiles and wood pulp is highly concentrated with added Methanol. The concentration used is 11 g per liter (!) in conjunction with 138 g per liter (a total of 149 grams!) of Sodium Chlorate ( $\text{NaClO}_3$ ), which is a much more aggressive and harmful oxidant. (Source: Georgia Institute of Technology)

The concentrations for the treatments described in my book do not usually exceed 0.003 g. If we speak of using Chlorine Dioxide as a bleach in applications, we are comparing with a solution that is 59,600 times more concentrated. Furthermore, the solution has a much stronger chemical composition, primarily due to Sodium Chlorate. We have to recognize that these false claims look good in the sensationalist media, to create controversy. However, these applications are far from the reality described in my book.

### Facts and Figures

1. Chlorine Dioxide is not a toxin that accumulates in the body.
2. In 100 years of use, there are only five documented cases of poisoning [due to the ingestion of Sodium Chlorite, the precursor of Chlorine Dioxide], where all of them survived with doses hundred times higher than recommended in my book.
3. If you breathe air that contains an amount of Chlorine Dioxide gas, you may experience irritation in the throat, nose, or lungs.
4. If it is too concentrated, it causes eye irritation that is reversible.
5. According to the data obtained to date and its extensive use for more than 100 years, Chlorine Dioxide can be considered not to cause cancer. That is, it is not carcinogenic.
6. There is also no evidence of harmful toxicity in terms of reproduction.

The toxicity of Chlorine Dioxide is true in the case of inhalation, which is not the same as ingestion. In the case of inhalation of air that contains a large amount of Chlorine Dioxide gas, you will experience irritation in your throat, nose, or lungs. If it is too concentrated, it causes reversible irritation in the eyes. Ingestion is not considered toxic, depending on the dose. Of course, inhalation of the gas is toxic during prolonged exposure.

Toxicity is always dependent on the amount, so if you ingest a large concentrated amount, you will experience irritations, even severe ones; but no volunteers mentioned in my book, who followed the treatments, were exposed to amounts that are large enough to be permanently harmful to the body. There is no scientifically documented fatal case of Chlorine Dioxide poisoning in the scientific literature. It probably induces vomiting long before a critical amount is reached by ingestion.

## Clinical Study of Chlorine Dioxide

A publication in 1982 revealed that a placebo-controlled and double-blind clinical study had been undertaken under the auspices of the US Environmental Protection Agency (EPA). The study demonstrated that it is relatively safe to ingest Chlorine Dioxide and its metabolites, Chlorite and Chlorate. Below are excerpts from the scientific paper of the study, which can be viewed online and be downloaded at this address: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1569027/>

---

### **Controlled Clinical Evaluations of Chlorine Dioxide, Chlorite and Chlorate in Man (by Judith R. Lubbers, Sudha Chauhan, Joseph R. Bianchine)**

To assess the relative safety of chronically administered chlorine water disinfectants in man, a controlled study was undertaken. The clinical evaluation was conducted in the three phases common to investigational drug studies. **Phase I, a rising dose tolerance investigation, examined the acute effects of progressively increasing single doses of chlorine disinfectants** [up to 24 mg/L for Chlorine Dioxide] **to normal healthy adult male volunteers.** Phase II considered the impact on normal subjects of daily ingestion of the disinfectants at a concentration of 5 mg/L for twelve consecutive weeks. Persons with a low level of glucose-6-phosphate dehydrogenase may be expected to be especially susceptible to oxidative stress; therefore, in Phase III, chlorite at a concentration of 5 mg/L was administered daily for twelve consecutive weeks to a small group of potentially at-risk glucose-6-phosphate dehydrogenase-deficient subjects. Physiological impact was assessed by evaluation of a battery of qualitative and quantitative tests. **The three phases of this controlled double-blind clinical evaluation of chlorine dioxide and its potential metabolites in human male volunteer subjects were completed uneventfully. There were no obvious undesirable clinical sequelae noted by any of the participating subjects or by the observing medical team. In several cases, statistically significant trends in certain biochemical or physiological parameters were associated with treatment; however, none of these trends was judged to have physiological consequence.** One cannot rule out the possibility that, over a longer treatment period, these trends might indeed achieve proportions of clinical importance. However, **by the absence of detrimental physiological responses within the limits of the study, the relative safety of oral ingestion of chlorine dioxide and its metabolites, chlorite and chlorate, was demonstrated. ...**

**The careful clinical evaluation of every subject in Phases I, II and III failed to reveal any clinically important impact upon the medical well-being of any subject as a result of disinfectant ingestion. ...**

During the course of the three-phase study, a massive volume of raw data was acquired. Routine urinalyses were performed and a meticulous examination of this body of information was made. **No definitive finding of detrimental physiological impact was made in any of the three phases of this human investigation of the relative safety and tolerance of oral chlorine disinfectant ingestion.** In several cases, statistically significant trends were associated with treatment; however, none of these trends was judged to have immediate physiological consequence. One cannot rule out the possibility that, over a longer treatment period, these trends might indeed achieve proportions of clinical importance. However, **within the limits of the study, the relative safety of oral ingestion of chlorine dioxide and its metabolites, chlorite and chlorate, was demonstrated by the absence of detrimental physiological response. ...**

---

The full paper of the above study is also available on the official website of Hon. Andreas Kalcker – along with the other informative papers on Chlorine Dioxide.

## Treaties on Chlorine Dioxide

### Human Rights – International Treaties on Chlorine Dioxide

- Human Right to Information
- Human Right to Health

The Inter-American Court of Human Rights has ordered all the member countries of the Inter-American Commission on Human Rights that, if there is any internal rule that goes against human rights or any international treaty that protects human rights, the country must disregard that rule.

The Declaration of Helsinki (with the status of an international treaty) of the World Medical Association, in its fourth article, states, "It is the duty of the physician to promote and safeguard the health, well-being, and rights of patients, including those who are involved in medical research. The physician's knowledge and conscience are dedicated to the fulfilment of this duty." In the seventh article, it states, "Medical research is subject to ethical standards that promote and ensure respect for all human subjects and protect their health and rights." In the ninth article, it deals with the right to self-determination.

The UN Economic and Social Council states that the obligations to protect influence the adoption of laws or other measures, to ensure the quality of health care services and to ensure that physicians and other health professionals have expertise.

- If a physician applies Chlorine Dioxide at the request of a patient and is dismissed from his or her job for that reason, it is illegal. The will of the duly informed patient is above all.
- If a physician abandons a patient by refusing to use Chlorine Dioxide and the patient dies, he or she will be held liable, both civilly and criminally, for medical malpractice. In the event that family members require such treatment, they should do so in writing and, in case of refusal, should file a complaint with the medical director or supervisor. And if there is no affirmative answer, they should go to the government authorities.
- If a physician uses the argument that Chlorine Dioxide is a toxic substance, he or she should be required to provide scientific documentation to prove it.
- If a health minister is duly informed of the existence of Chlorine Dioxide and its curative effect even without scientific evidence and ignores it, and if he or she prohibits its use by the population, he or she can be denounced to the national justice system, the Inter-American Commission on Human Rights, and the Inter-American Court of Human Rights.
- If, in addition, an official makes false statements about Chlorine Dioxide by lying to the population, he or she is violating the international human right to information, which must be truthful and timely, and can therefore be denounced to the courts. And if this leads to the death of citizens, it can become a crime of genocide.

(Source: Dr. Guillermo Robertson, Federal Commissioner of the International Commission on Human Rights.)(Watch video 41 in Appendix Q for more information on human rights.)

Hon. Andreas Kalcker says, "I personally am very clear that there can be no government law above human law that tries to preserve life in a dignified way. So I am going to defend the right to experiment with oneself, especially for people who have no other option when suffering from a terminal or serious illness. **Any law that prohibits voluntary use invalidates itself by being criminal, and by attacking the fundamental right to life. Nothing can be above the right to life and self-determination.**"

**Corporations/Organizations:** Facebook, Twitter, Google, YouTube, Microsoft, Amazon, WHO, PAHO, GAVI, media outlets, troll farms, hospitals, websites, etc.

**Disinformation, Suppression, and Fearmongering (notably in the US):** Propagate fake and scary information on the dangers or inefficacy of MMS/CDS. Suppress the truth on MMS/CDS's ability in preventing and treating COVID-19. Ignore the clinical/scientific evidence on the efficacy of CDS against COVID-19. Create stress/anxiety with social distancing/mask wearing/lockdown/fake news. Inflate the death toll by including COVID-19-unrelated and -assumed deaths. Propagate a false belief that vaccination is the only solution to the pandemic.

**Violation of Human Rights:** Deny every citizen worldwide his/her fundamental human right to know the truth about Chlorine Dioxide and to use it through MMS or CDS – for preventing or treating COVID-19 and all other microbial diseases.

**Crimes against Humanity:** Deliberately cause many deaths and sufferings worldwide – which can simply be prevented with oral ingestion or intravenous infusion of Dilute CDS – in pursuit of hidden economic, political, or evil agenda.

## Crimes against Humanity: Chinese Communist Party

**Chinese Communist Party (CCP):** Communist, Atheistic, and Totalitarian Regime  
(Year 2019: CCP members  $\approx$  92 million; China's population  $\approx$  1,434 million)

Denial of Rights to Freedom of Religion, Expression, Association, and Assembly

Incarceration and Repression of Tibetans, Uighurs, and Other Ethnic Minorities

Discrimination toward Lesbian, Gay, Bisexual, Transgender, and Intersex People

Persecution and Organ Harvesting of Religious Minorities and Political Dissidents

Indoctrination, Forced Labor, and Abuse in State Prisons and Internment Camps

Death Penalty for Nonviolent Crimes and Unfair Trials under the Judicial System

Prosecution of Human Rights Defenders and Harassment of Their Family Members

Disinformation/Suppression against MMS/CDS for Preventing/Treating COVID-19  
(China has a large reserve of Sodium Chlorite for making Dilute CDS.)

**Crimes against Humanity:** Many Undisclosed Deaths and Untold Miseries in China

## Join the Resistance

You, the reader or recipient of this lifesaving ebook, are invited to join the noble fight of the Resistance against Big Pharma & Partners. If you wish to be a part of the Resistance, share this ebook of lifesaving information far and wide. Share it with your loved ones, your friends, and even strangers – from home and abroad. Help save citizens worldwide from the evils and tyrannies of Big Pharma & Partners.

**Hon. Jim Humble**

**Sir Humphry Davy**

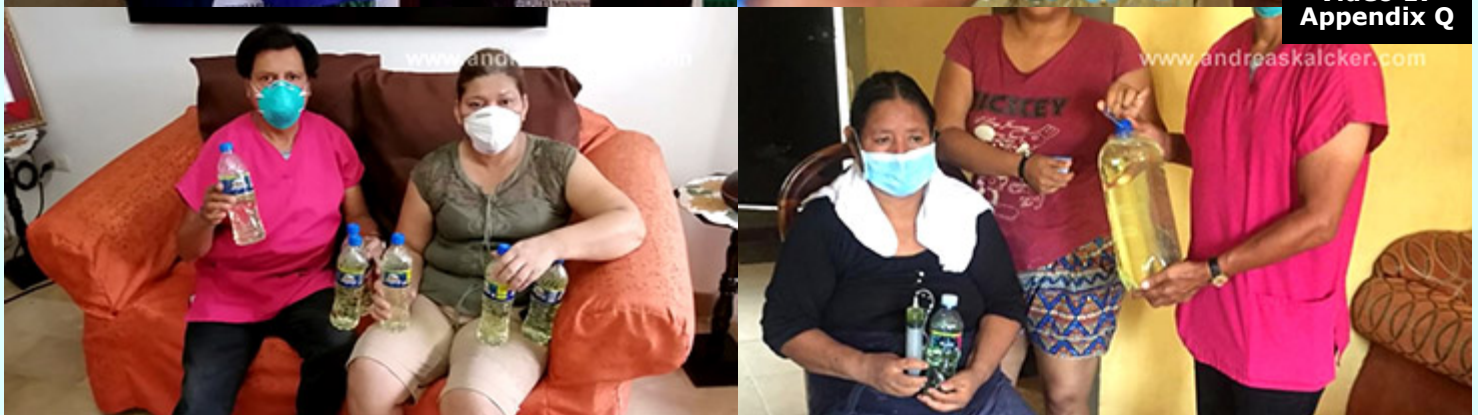

**Hon. Andreas Kalcker**

From March 26 to April 10, 2020, a preliminary clinical trial using Dilute CDS to treat COVID-19 was conducted in Ecuador, South America, by AEMEMI (Association of Ecuadorian Doctors in Integrative Medicine). [Click/tap here](#) for the official report.

**Video 17  
Appendix Q**

**Clinical trial: health care professionals, COVID-19 patients, and Dilute CDS.**

The trial was a complete success – all the 104 patients recovered, whose age were between 8 and 84. Some of them were already very ill and needed ventilators. 97% of them were asymptomatic after the 4th day of treatment, and the rest recovered at home on the following days. Most of them took the Dilute CDS orally and some intravenously. The prescribed oral dosage was usually 50 mg of Chlorine Dioxide a day in 10 divided doses – which was  $\approx 1.67$  mL of 3,000-ppm CDS (diluted with water) an hour, 10 times a day. A Bolivian physician has recommended 120 mg of Chlorine Dioxide a day (ie, 2 mL of 3,000-ppm CDS each 15 minutes, two 10-dose sessions a day under Protocol F) for treating patients with severe symptoms.

Video 17  
Appendix Q

**Clinical trial: health care professionals, COVID-19 patients, and Dilute CDS.**

The lifesaving information in this ebook can be disseminated through file sharing or ebook distribution (eg, file sharing via these apps, services, or platforms: Signal, WhatsApp, Telegram, WeChat, Gmail, ProtonMail, Tutanota, Private-Mail, µTorrent, Vuze, I2PSnark, Mega, Icedrive, pCloud, MediaFire, Sync, Facebook, MeWe, Twitter, Parler, Gab, Pinterest, DeviantArt, Instagram, Reddit, Steemit, WordPress, Blogger, Medium, YouTube, BitChute, Brighteon, Odysee, iPetitions, Change, GoPetition, etc).

If your government – like the US, UK, CA, AU, NZ, and CCP governments – is being controlled or manipulated (eg, through trade, funding, bribery, threats, or deception) by Big Pharma & Partners, you should be stealthy in sharing/distributing this ebook. This is for avoiding any wrongful charge for spreading fake/dangerous information.

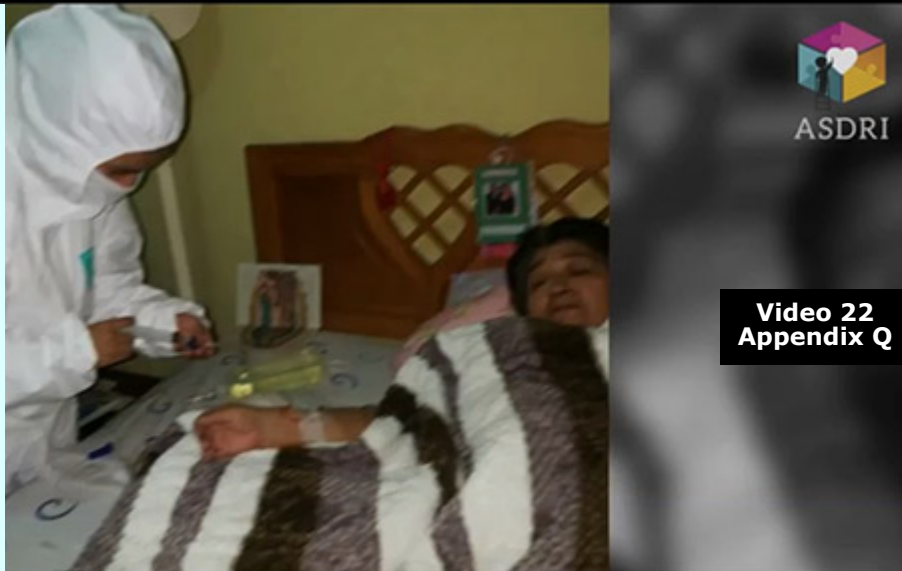

Bolivia, in South America, has 11.6 million people. On August 5, 2020, its congress approved a bill – authorizing the emergency production, marketing, supply, and use of Chlorine Dioxide Solution (CDS) for the prevention and treatment of COVID-19.

75% of Bolivia's congress recovered from COVID-19 with Dilute CDS.  
**Video 36**  
**Appendix Q**

**more than 60 % of my family got sick with Covid. The senators have passed a law for the manufacture and distribution of chlorine dioxide**

The use of Dilute CDS for preventing and treating COVID-19 – through oral ingestion or intravenous infusion – is effective, safe, simple, cheap, and revolutionary. The BPP-controlled YouTube has been banning videos like this, which are available on Brighteon, BitChute, Odysee, or other video-sharing platforms that support the freedom of speech or expression.

**Video 22**  
**Appendix Q**

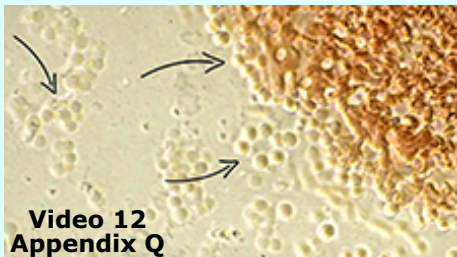

**My family treated me with intravenous Chlorine Dioxide**

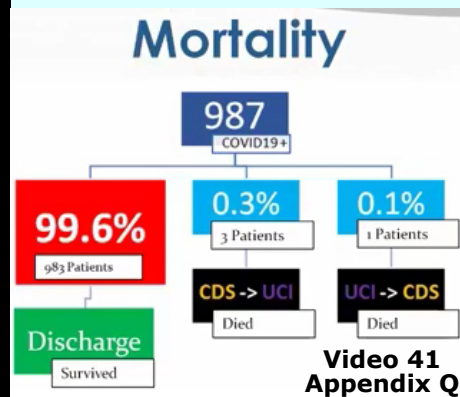

**!CAUTION!**  
 The ruthless Big Pharma & Partners have long been criticizing MMS and CDS through media outlets, troll farms (ie, internet armies and influencers), hospitals (ie, physicians and directors), websites, regulators, agencies, etc. **DO NOT FALL VICTIM** to their propagation of fake and scary information – which is a cold-blooded **CRIME AGAINST HUMANITY.**

**walk and now I'm really happy. Thanks to CDS**

Treating COVID-19 with IV infusion of Dilute CDS is not only effective and safe but also **amazing**. In addition to destroying the COVID-19 virus, the Dilute CDS **oxygenates** – an amazing ability – the blood for rapid recovery.

In a retrospective study by COMUSAV Mexico, the recovery rate of the first 987 COVID-19+ patients was found to be 99.6%.

When my brother signed my voluntary hospital discharge I got back to my home and I began a different treatment

- The Solidarity Trial, coordinated by the WHO, found that Remdesivir, Hydroxychloroquine, Lopinavir/Ritonavir, and interferon regimens had little or no effect on the overall mortality, initiation of ventilation, and duration of stay among hospitalized patients.
- The oral or intravenous use of Dilute CDS goes against the use of drugs, threatening the earnings of Big Pharma & Partners.

**COVID-19 Treatment (Drugs vs Dilute CDS)**

**Drugs: Interferon β-1b, Lopinavir, Remdesivir, or Hydroxychloroquine**

Mild illness: Good  
 Critical illness: Poor  
 Adverse effects: Possible  
 Toxic residues: Possible  
 Effectiveness: Moderate

**Dilute CDS: Oral or IV**

Mild illness: Good  
 Critical illness: Good  
 Adverse effects: None  
 Toxic residues: None  
 Effectiveness: High

the Chlorine dioxide was simply great.

The mayor of Santo Domingo, Ecuador, handing out bottles of Dilute CDS to citizens:

**\$\$\$**

A wealthy businessman is offering **1 million US\$** to anyone who can **prove that Dilute CDS is toxic or harmful** to the human body.

## Quotations on Revolution

"Few will have the greatness to bend history itself, but each of us can work to change a small portion of events. It is from numberless diverse acts of courage and belief that human history is shaped. Each time a man stands up for an ideal, or acts to improve the lot of others, or strikes out against injustice, sends forth a tiny ripple of hope, and crossing each other from a million different centers of energy and daring those ripples build a current which can sweep down the mightiest walls of oppression and resistance." ~ Robert F. Kennedy

"Every time we turn our heads the other way when we see the law flouted, when we tolerate what we know to be wrong, when we close our eyes and ears to the corrupt because we are too busy or too frightened, when we fail to speak up and speak out, we strike a blow against freedom and decency and justice." ~ Robert F. Kennedy

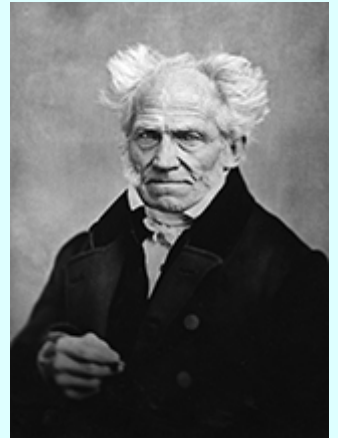

"The world will not be destroyed by those who do evil, but by those who watch them without doing anything." ~ Albert Einstein

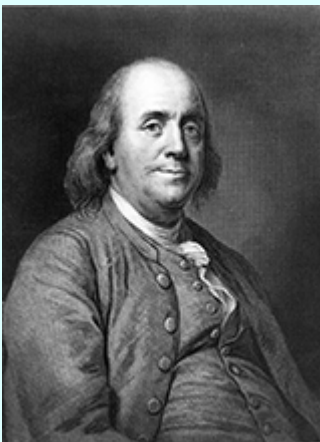

"Condemnation without investigation is the height of ignorance." ~ Albert Einstein

"Blind belief in authority is the greatest enemy of truth." ~ Albert Einstein

"All truth passes through three stages. First, it is ridiculed. Second, it is violently opposed. Third, it is accepted as being self-evident." ~ Arthur Schopenhauer

"The majority of men... are not capable of thinking, but only of believing, and... are not accessible to reason, but only to authority." ~ Arthur Schopenhauer

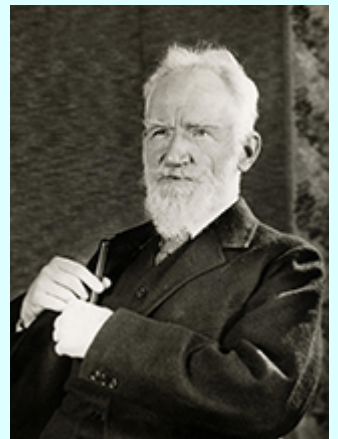

"War is when the government tells you who the bad guy is. Revolution is when you decide that for yourself." ~ Benjamin Franklin

"Whoever would overthrow the liberty of a nation must begin by subduing the freeness of speech." ~ Benjamin Franklin

"It is the first responsibility of every citizen to question authority." ~ Benjamin Franklin

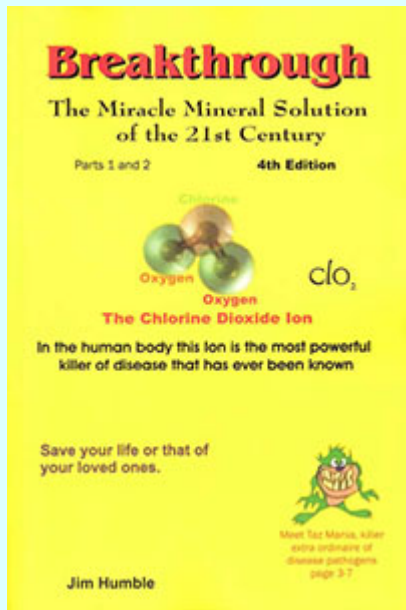

"Beware of false knowledge; it is more dangerous than ignorance." ~ George Bernard Shaw

"Progress is impossible without change; and those who cannot change their minds cannot change anything." ~ George Bernard Shaw

2. The Master Mineral Solution of the Third Millennium  
(© 2011 by Jim Humble)

3. MMS Health Recovery Guidebook  
(© 2016 by Jim Humble & Cari Lloyd)

4. Forbidden Health: Incurable Was Yesterday  
(© 2016 by Andreas Kalcker)

Big Pharma & Partners have been hindering the purchase of Hon. Jim Humble's and Hon. Andreas Kalcker's books; for instance, Amazon has banned all of their books. The online retailers of their books can be located through their official websites. Big Pharma & Partners are behind all the disinformation and suppression against them as well as MMS and CDS. For instance, the free online encyclopedia Wikipedia is being controlled or funded by Big Pharma & Partners to provide fake and scary information about Hon. Jim Humble and MMS. The other popular websites that propagate the disinformation include Business Insider, NBC News, and The Guardian.

The widespread use of MMS and CDS for preventing and treating a wide range of diseases, if supported by governments worldwide, will cripple or ruin the global pharmaceutical industry – slashing the earnings, thwarting the plans, and exposing the lies of Big Pharma & Partners. This is what Big Pharma & Partners fear so much and will go all out to prevent – even through crime – from ever happening.

## 5. Deadly Medicines and Organised Crime: How Big Pharma has Corrupted Healthcare (© 2013 by Peter C. Gøtzsche)

Professor Peter C. Gøtzsche graduated as a Master of Science in biology and chemistry (1974) and as a physician (1984). He is a specialist in internal medicine; he worked with clinical trials and regulatory affairs in the drug industry (1975–1983) and at hospitals in Copenhagen (1984–1995). With about 80 others, he co-founded the Cochrane Collaboration in 1993 (the founder is Sir Iain Chalmers) and established the Nordic Cochrane Centre the same year. He became Professor of Clinical Research Design and Analysis in 2010 at the University of Copenhagen, and he has been a member of the Cochrane Governing Board twice. In 2018, he was wrongfully expelled from the Cochrane Collaboration after he published a well-founded criticism of the Human Papilloma Virus (HPV) vaccine (the vaccine is supported by the vaccine alliance GAVI). He founded the Institute for Scientific Freedom in 2019.

Below is a review of this book in the *Kennedy Institute of Ethics Journal*.

From the title, *Deadly Medicines and Organised Crime: How Big Pharma has Corrupted Healthcare*, Peter Gøtzsche makes the thesis of his book very clear. Not only does the pharmaceutical industry contribute to detrimental health outcomes through biased research, deceptive marketing, and disease mongering, but the industry's business model meets the criteria of an organized criminal operation. Gøtzsche argues for this in two parts. First, he defines organized crime by drawing upon the United States Organized Crime Control Act of 1970, the centerpiece of which is the Racketeer Influenced and Corrupt Organizations Act (RICO) (18 U.S.C. §§1961-1968). RICO prohibits deriving income from a pattern of racketeering activity, including (among other things) murder, kidnapping, robbery, bribery, extortion, and dealing in a controlled substance. Second, he argues that big pharma derives much of its income from repeated racketeering activities. He does this in part by laying out his 'hall of shame,' which is a list of cases in which large pharmaceutical companies [ie, Pfizer (US), Novartis (Switzerland), Sanofi-Aventis (France), GlaxoSmithKline (UK), AstraZeneca (UK), Roche (Switzerland), Johnson & Johnson (US), Merck (US), Eli Lilly (US), and Abbott (US)] have agreed to pay settlement fines for fraud, illegal marketing, misrepresentation of research results, and other offenses, and in part by examining various deceptive activities that are standard in the industry, including manipulation of clinical trial results, coopting of university researchers, ghost writing, and deceptive marketing. Big pharma, he argues, engages in racketeering activity so often that "there can be no doubt that its business model fulfills the criteria for organised crime". Gøtzsche is not alone in comparing the pharmaceutical industry to an organized criminal enterprise. In a striking passage, Gøtzsche quotes Peter Rost, a former Pfizer marketing vice president [who turned whistleblower when the company would not listen to his complaints about illegal marketing], as follows:

"It is scary how many similarities there are between this industry and the mob. The mob makes obscene amounts of money, as does this industry. The side effects of organized crime are killings and deaths, and the side effects are the same in this industry. The mob bribes politicians and others, and so does the drug industry."

According to Professor Gøtzsche, "[b]ribery is routine and involves large amounts of money. Almost every type of person who can affect the interests of the industry has been bribed: doctors, hospital administrators, cabinet ministers, health inspectors, customs officers, tax assessors, drug registration officials, factory inspectors, pricing officials and political parties. In Latin America, posts as ministers of health are avidly sought, as these ministers are almost invariably rich with wealth coming from the drug industry." ### Jim Humble

In 1996, a man named Jim Humble discovered that a simple water purification substance (which at the time was used worldwide) was effective in eradicating malaria, a disease caused by a microscopic parasite. After the first cases of malaria had recovered, he went on to develop a formula using that substance mixed with a food-grade acid – he called it MMS (Miracle Mineral Supplement, later renamed Master Mineral Solution). Since that time, **MMS has proven to restore partial or full health to hundreds of thousands of people suffering from a wide range of diseases.** Hon. Jim Humble says in his book *The Miracle Mineral Solution of the 21st Century*, "I'm sure you must be thinking that with such an amazing cure, philanthropists like Oprah Winfrey and Bill Gates would be standing in line to give me money to carry out my mission, but that is not the case. It took a while to get it all figured out, but I finally realized it is all based on money or the desire for prestige. Oprah wants to know what is going to bring her TV program the biggest audience, because that is what brings in the money, and Bill Gates does not build his prestige by helping the little guy. His millions go to the big pharmaceutical laboratories, which in turn gain him powerful friends throughout the world. To invest in something that works but reduces the income of the pharmaceutical companies would be unthinkable."

### Andreas Kalcker ←click/tap

Hon. Andreas Kalcker says in his book *Forbidden Health: Incurable Was Yesterday*, "When I found out by my own means that there were alternatives to conventional medicine, it was eye opening. From that point on, I dedicated myself to research a substance known as MMS, which is no more no less than **Chlorine Dioxide, one of the most widely used and effective disinfectants for over 100 years of our human history, and that hasn't created any resistance [ie, the resistance from pathogens].** Well, I beg your pardon... we have to admit that it does create resistance, since there are some attention-seeking detractors [ie, Big Pharma & Partners] who see it as a dangerous and poisonous substance and hence, this is a controversial subject."

COMUSAV (Coalición Mundial Salud y Vida/World Health and Life Coalition) is a nonprofit global coalition of physicians, scientists, therapists, lawyers, and other professionals that aims to save lives and to end the COVID-19 pandemic with CDS. As of March 2021, COMUSAV was present in 25 countries with over 5,000 physicians using CDS – with a high effectiveness in treating COVID-19 patients and no adverse side effects whatsoever. **"In fact, the use of CDS is not a medical problem at all. It is simply a regulatory and political problem or issue.** Regardless of all this, [COMUSAV has] managed to prove that the substance can be used safely, and it has even become fully legal in Bolivia." After a month of authorized use, COMUSAV managed to declare the first *Corona-free* city in Bolivia (ie, San Juan de Chiquitos) with about 50,000 inhabitants, while all the neighboring cities were still heavily infected. **Join these courageous and honorable individuals in their mission to spread the truth about Chlorine Dioxide and CDS, as well as ending the COVID-19 pandemic with CDS:**

## How to Share this Ebook

Below are ways to share with as many citizens as possible around the world.

1. Share this ebook directly from a smartphone or from a tablet, laptop, or desktop computer via an instant messaging app (eg, Telegram, WhatsApp, Signal, or Tox).
2. Store this ebook at several file storage services (eg, Mega, Icedrive, MediaFire, pCloud, and Sync), each of which will provide a download link (ie, the web address of the download webpage). Share the download links on networking platforms (eg, Facebook, MeWe, Gab, Parler, and Minds), video platforms (eg, YouTube, Brighteon, and BitChute), discussion platforms (eg, Reddit, Digital Point, and Off Topic), image platforms (eg, Pinterest, Flickr, and Imgur), and other types of social platforms. Share one different download link at a time, so that if any of the stored ebooks is removed by Big Pharma & Partners, it will not affect the other download links.
3. In order to share this ebook with strangers from home or abroad via email (eg, via Outlook, Gmail, ProtonMail, Tutanota, Private-Mail, or Mailfence), search online for their email addresses on governmental, commercial, nonprofit, and personal websites. For instance, some channel owners on the BPP-controlled YouTube provide their email addresses in the *About* sections of their channels. Some website owners provide their email addresses in the *Contact* sections of their websites.

4. Comment on the articles or posts on many blogs or websites. Add a request to your comments, requesting the blog or website owners to help share this ebook.
5. If you own a blog or website, share the download link on the homepage and in every post or article. If you do not own any, you can create a free blog or website via a blog- or website-creation platform (eg, WordPress, Blogger, Yola, or Weebly).
6. Launch an online petition to use Dilute CDS for fighting the COVID-19 pandemic. Create the petition via a petition platform (eg, Change, iPetitions, or GoPetition). Share the download link in the petition. Share the petition webpage far and wide.
7. Share through BitTorrent, a decentralized protocol for peer-to-peer (P2P) file sharing. Create a torrent of this ebook and seed it via a torrent app (eg,  $\mu$ Torrent, I2PSnark, or Vuze), or request a torrent seeder to create the torrent and seed it.

Use any other way to share this ebook. **You should be stealthy and creative if your government is being controlled/manipulated by the ruthless Big Pharma & Partners.**

Email example for sharing this ebook via email (copy it into the email app):

Subject: Lifesaving Information for Fighting the COVID-19 Pandemic

Dear Fellow Citizen,/Citizen of ...,/Sir or Madam,/Senator .../Mr. .../Others,

I would like to inform you truthfully about this devastating COVID-19 pandemic. **Since the beginning of this pandemic, a powerful and ruthless entity has been distorting and suppressing the information about a very effective, save, simple, and cheap substance for preventing and treating COVID-19.**

Please download and read the free ebook below for your full understanding.

**Clinical Evidence: a critically ill patient recovered with IV saline Dilute CDS.**

**Clinical Case**

- October 15th, to the fifth day of IV, CDI administration; the left lung clean in 80%, and the right lung clean in its entirety
- No longer necessity of ventilator on October 28th,
- Same day CDI no more needed
- Negative PCR on October 27th

**Exposing BPP: Funding and Conspiring to Commit Acts of Terror (Bioterrorism)**

**Video 64 Appendix Q**

"Daszak reiterated that, until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated."<sup>12</sup>

18 U.S.C. §2339 C et seq. – Funding and Conspiring to Commit Acts of Terror

## Terms and Abbreviations

**Big Pharma:** The corporations, government agencies, nongovernmental organizations, politicians, and physicians that profit from the trillion-dollar-a-year global pharmaceutical (ie, biotech- and nonbiotech-drug) industry.

**Deep State:** The network of people and organizations within a government that secretly manipulates the government into adopting its own policies.

**Global Elite:** The wealthy and powerful individuals (or the elites) around the world who group together to shape the world to their liking.

**Evil Fascists:** The organizations or governments that support technological fascism (or technofascism) and secretly carry out immoral or illegal activities.

**MMS:** Master Mineral Solution

**NaClO<sub>2</sub>:** Sodium Chlorite

**CDS/I:** Chlorine Dioxide Solution/Infusion

**ClO<sub>2</sub>:** Chlorine Dioxide    **Dilute:** diluted

**CAS:** Citric Acid Solution

**C<sub>6</sub>H<sub>8</sub>O<sub>7</sub>:** Citric Acid    **HCl:** Hydrochloric Acid

**HAS:** Hydrochloric Acid Solution

**NaClO<sub>3</sub>:** Sodium Chlorate

**SCS:** Sodium Chlorite Solution

**NaOCl:** Sodium Hypochlorite

**MRSA:** Methicillin-Resistant  
Staphylococcus Aureus

**HDPE:** High-Density Polyethylene

**AIDS:** Acquired Immune Deficiency  
Syndrome

**PE:** Polyethylene    **PP:** Polypropylene

**PET:** Polyethylene Terephthalate

**EVD:** Ebola Virus Disease

**mL:** milliliter(s)    **C:** Celsius

**COVID-19:** Coronavirus Disease 2019

**L:** liter(s); 1 L = 1,000 mL

**COMUSAV:** World Health and Life Coalition

**tsp:** teaspoon(s); 1 tsp ≈ 5 mL

**WHO:** World Health Organization

**mg:** milligram(s)    **m:** meter(s)

**PAHO:** Pan American Health Organization

**g:** gram(s); 1 g = 1,000 mg

**SDG:** Sustainable Development Goal

**kg:** kilogram(s); 1 kg = 1,000 g

**UNICEF:** United Nations International  
Children's Fund

**kg/m<sup>2</sup>:** kilogram(s) per square meter

**ppm:** part(s) per million; 1 ppm ≈ 1 mg/L

**GAVI:** Global Alliance for Vaccination  
and Immunization

**lb:** pound(s); 2.2 lb ≈ 1 kg

**FDA:** Food and Drug Administration

**fl oz:** fluid ounce(s); 1 fl oz ≈ 30 mL

**EPA:** Environmental Protection Agency

**pH:** acid-base scale, ranges from 0 to 14

**BPP:** Big Pharma & Partners

**ALA:** Alpha-Linolenic Acid

**CCP:** Chinese Communist Party

**LA:** Linoleic Acid    **eg:** for example

**UN:** United Nations    **AU:** Australia

**Hon.:** Honorable    **Dr.:** Doctor    **vs:** versus

**UK:** United Kingdom    **CA:** Canada

**etc:** and all the others    **IV:** Intravenous

**US:** United States    **NZ:** New Zealand

**ie:** that is    **acth:** any combination thereof

# !CAUTION!

If your government endorses drugs/vaccines and prohibits  $\text{ClO}_2$ /MMS/CDS for preventing or treating diseases, there are 2 possibilities:

1. It is being controlled or manipulated by the evil and ruthless Big Pharma & Partners.
2. It is an integral part (ie, the Evil Fascists) of the evil and ruthless Big Pharma & Partners.

BPP-controlled or -manipulated governments are common worldwide. They will suppress, criticize, and prohibit any alternative medicine or therapy that can truly cripple or ruin BPP. The disinformation and suppression against Chlorine Dioxide, MMS, and CDS are good examples. Imagine what will happen to BPP if all the diseases faced by humans and animals are allowed to be treated with oral Dilute MMS and CDS and intravenous Dilute CDS – which have been proven effective, safe, simple, and cheap against a wide range of diseases, from MALARIA (a parasite-caused disease) to COVID-19 (a virus-caused disease).

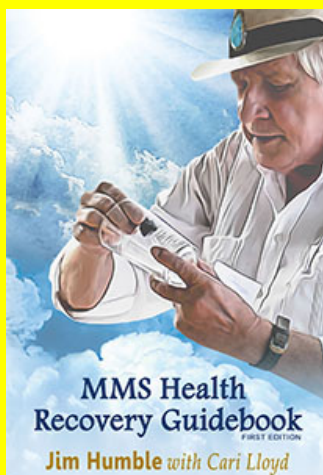

**DO NOT FALL VICTIM** to the lies or the fake and scary information about Chlorine Dioxide, MMS, or CDS. **DO NOT BE DECEIVED** by the BPP-controlled or -manipulated governments.

# !WARNING!

**The substances below possess the ability to treat a wide range of diseases faced by all humanity.**

**Master Mineral Solution (MMS)  
Sodium Chlorite Solution (SCS)  
Chlorine Dioxide Solution (CDS)  
Chlorine Dioxide Infusion (CDI)  
Chlorine Dioxide Holding (CDH)  
Chlorine Dioxide Solution Plus (CDS+)**

**If you distort or suppress the information about their successful use or curative properties, or if you forbid or criticize their use for treating diseases or saving lives, you commit a **CRIME AGAINST HUMANITY.****

**GOD  
or the FORCE  
is watching  
our every  
thought and  
deed!**

# **SURVIVAL TIP**

**Have MMS/CDS materials ready at home for any potential threat from viral outbreak/pandemic or bioterrorism/biowarfare:**

- **80% Sodium Chlorite powder**
  - **99% Citric Acid powder**
- **4% Hydrochloric Acid solution**

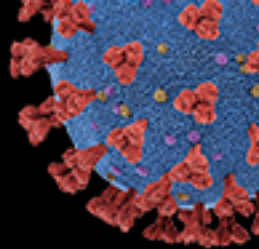

**To date, no virus has developed resistance against Chlorine Dioxide.**

**Fear not the human flu, bird flu, pig flu, horse flu, cat flu, bat flu...**

**Join the Noble Fight of the Resistance against Big Pharma & Partners!**

# **Good Luck!**

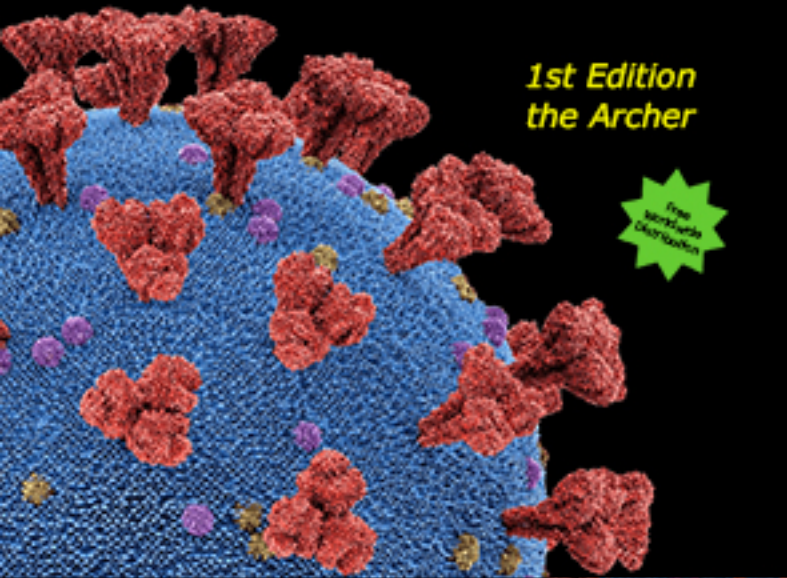

**May the FORCE be with You!**
